

Members meeting

10 May 2017

What has become our annual members meeting, at the end of our season of lecture season. It consisted of the following talks:

1. Alan Gray on Fuerteventura, concentrating on the Plate Tectonics setting. An interesting contrast to last year's talk on the Azores.
2. Tenby field trip report by Roger Hunt. Amazingly Roger got this together the day after we returned. Most impressive. [Click here](#) for the full write up.
3. Reports from our sub-groups, namely:

- Fossils
- Landscape Appreciation
- Maps
- Plate Tectonics

Sadly there was no time for questions.
